macOS As of 2012, AutoCAD LT for Mac is cross-platform (Windows and OS X). A more powerful version, AutoCAD LT Pro 2013, which is available for OS X only, was released in November 2012. AutoCAD LT's XML, a cross-platform drawing format, was also extended and released as a separate product in 2012. Since its release, AutoCAD LT Pro 2013 has received positive reviews and has become the de facto standard for drafting on macOS. AutoCAD LT is available for both the Mac App Store and the Mac App Store Download. Mac App Store AutoCAD LT Pro 2013 for macOS was released on the Mac App Store on 11 November 2012. AutoCAD LT Pro 2013 includes the same features as the AutoCAD LT version for Windows and includes tools to allow users to print or export drawings directly from the program. Users can also import and edit drawings from other Mac compatible CAD applications, including the native ones built in Apple applications such as Keynote and Pages. AutoCAD LT Pro 2013 also includes a native version of the Access database engine for iOS and Mac. The version on the Mac App Store also allows users to share their drawings. To share a drawing, the user clicks the share button, and a dialog box opens. The user can choose from a range of social media platforms including Facebook, Google+, LinkedIn, Twitter and Vimeo. While the dialog box opens, the user is able to browse to any local network or cloud drive. The user then enters a text description of the drawing that will be attached to the posted document. The description can be up to 1,000 characters long. The new version of AutoCAD LT Pro 2013 is available on the Mac App Store. It includes the following key features: Creation of 3D models Creation of 2D drawings Supported on both iMac and Macbook Use the native database engine for iOS and Mac Mac App Store Download The AutoCAD LT Pro 2013 version, available from the Mac App Store Download, supports only Windows and is not available for the Mac App Store. Now navigate to the Autodesk Autocad location (with internet browser). For example: "C:\Program Files\Autodesk\Autocad" Then look for the Autocad.exe file in the application folder and run it. When the application is closed, copy and paste the file ACAD_12345.exe (where 12345 is the Autocad version). Double click on the file to launch. *If you already have a license key in the output folder, you can skip this step. * Now you are in Autocad, just double click on the application icon. * To get help, press the "?" button in the top right corner.
